

Find the hidden badges

Set your badge to *conference mode (upper position)* and begin exploring.

Mischievous Simon has hidden ten badges at our event. It's up to you to find every single one. Luckily, he left some clues:

- ☐ Burn after reading
- ☐ Human powered single tracks stay dry
- ☐ Please do not tap on the glass
- ☐ There are more than two vertical people transporters
- ☐ Weary travelers shed the dust of the road
- ☐ Rich sea creatures read newspapers too
- ☐ A penny saved is a penny earned
- ☐ It has been x days since ...
- ☐ Thirteen letter inception
- ☐ Find Simon & sing the IT Crowd's new emergency number by heart

If your badge stays in direct sight of an undiscovered badge for 15 seconds, you'll automatically unlock that location.

Ready to brag about your loot? Press the upper right touch button to display your treasure hunt progress.

1. Get started – Set both switches to upper position

2. Meet people – It's a conference, get networking!

3. Explore – Find the hidden badges

Gotta Catch 'Em All!

Set your badge to *conference mode (upper position)* and start gathering unique contacts.

Get networking and engage in conversations. If your badge stays in sight of an unrecognized badge for two minutes, a new unique contact is registered.

Let's see how many colleagues you can get to know at our event. Press the upper left touch button to display the total number of connections you have collected.

PLAY MODE

PLY

Jog your memory!

Set your badge into *play mode* (centre position) and play a round of Simon (known in Germany as “Senso”).

Choose to start a new sequence or retry the previous one. Your [S]core and eternal [H]igh-score are displayed. Boast your high-score while in conference mode. Power via USB if needed.

SENSOR MODE

SEN

How cool is that?!

Once the conference is over, turn your badge into a temperature and/or humidity display.

Power your badge via USB and set it to sensor mode (lower position). The badge updates every few seconds, showing temperature [°C], humidity [h], or cycling through both [°Ch].

HARDWARE

Four **touch-sensitive buttons**

Infrared receiver

Infrared transmitter

Mode switch

↑ - Conference
⇒ - Play
↓ - Sensor

Power switch

↑ - On (Battery)
⇒ - On (USB)
↓ - Off

Micro USB

POWER SUPPLY

Once the conference is over, you can use your badge as a temperature and/or humidity display or play a game of Simon.

Use the micro-USB socket to power your badge indefinitely.

...on (Battery): Power switch to **upper position**

I want to turn my badge... ...on (USB): Power switch to **center position**

...off: Power switch to **lower position**
